

Convention diagnostic | bout_162 (353 frames, 0.44 s)

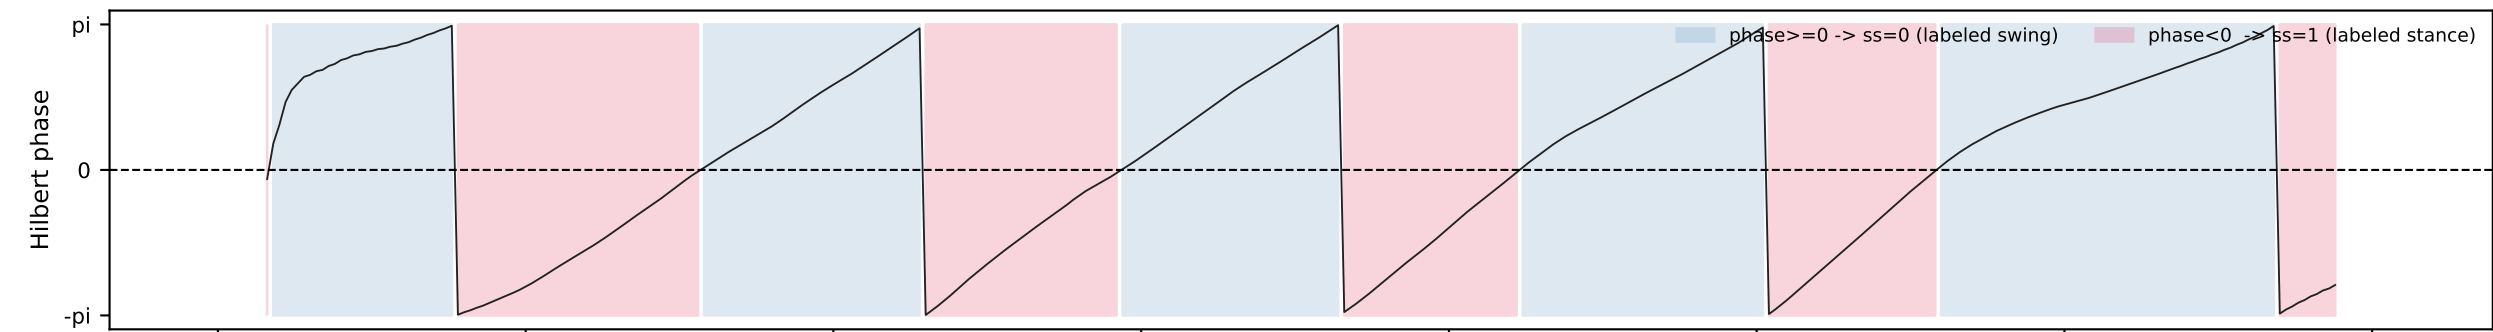

World-frame tip Z (HIGH = leg in air = SWING)

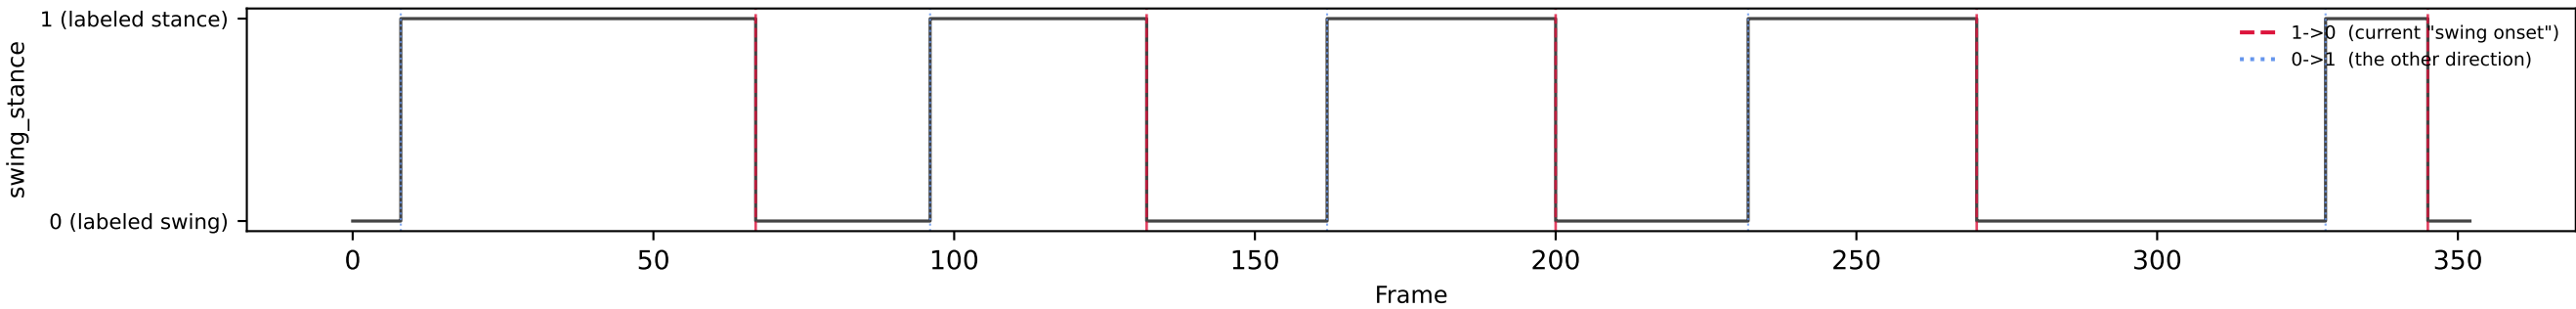

Tibia angle input to Hilbert transform

Hilbert phase (blue bg = phase ≥ 0 = ss=0; red bg = phase < 0 = ss=1)

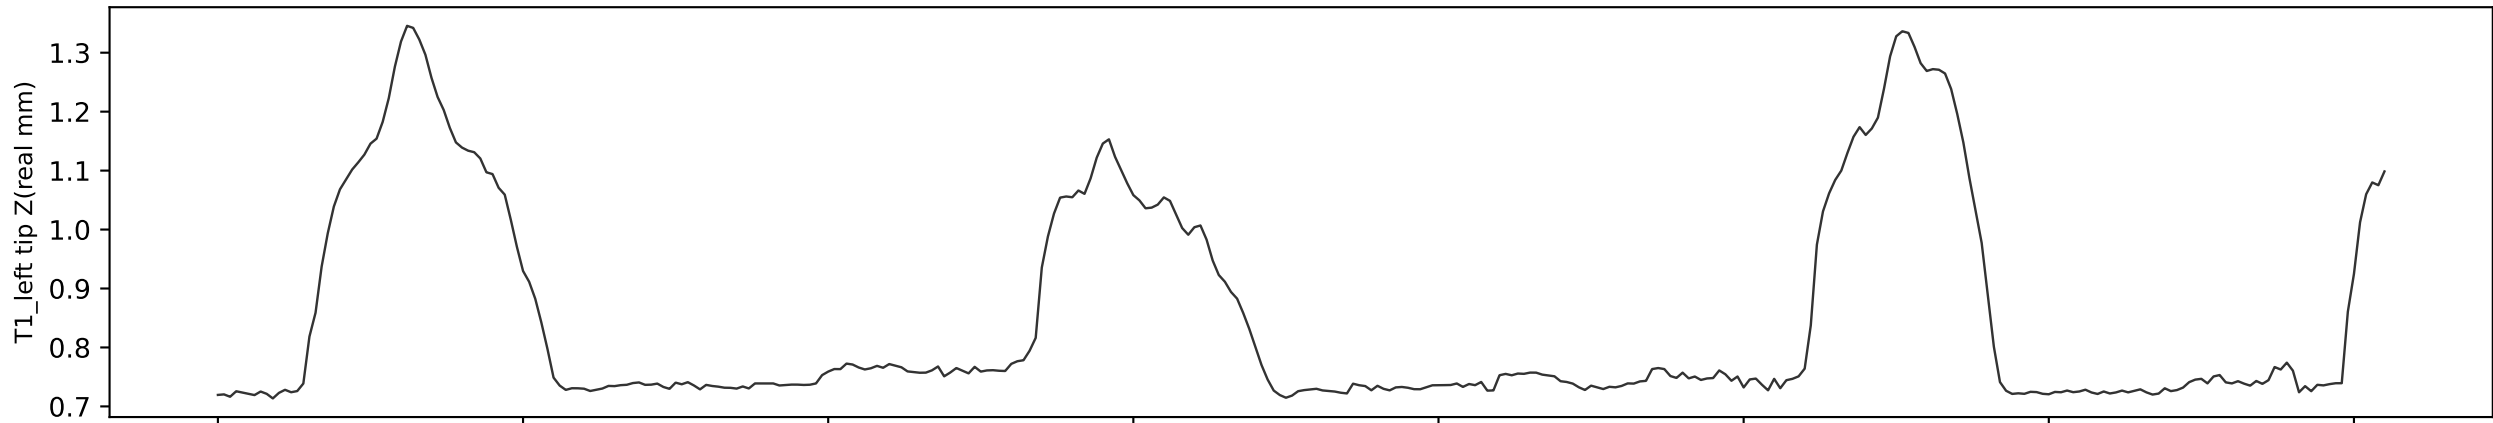

Check: which transition type aligns with RISING tip Z (leg liftoff)?

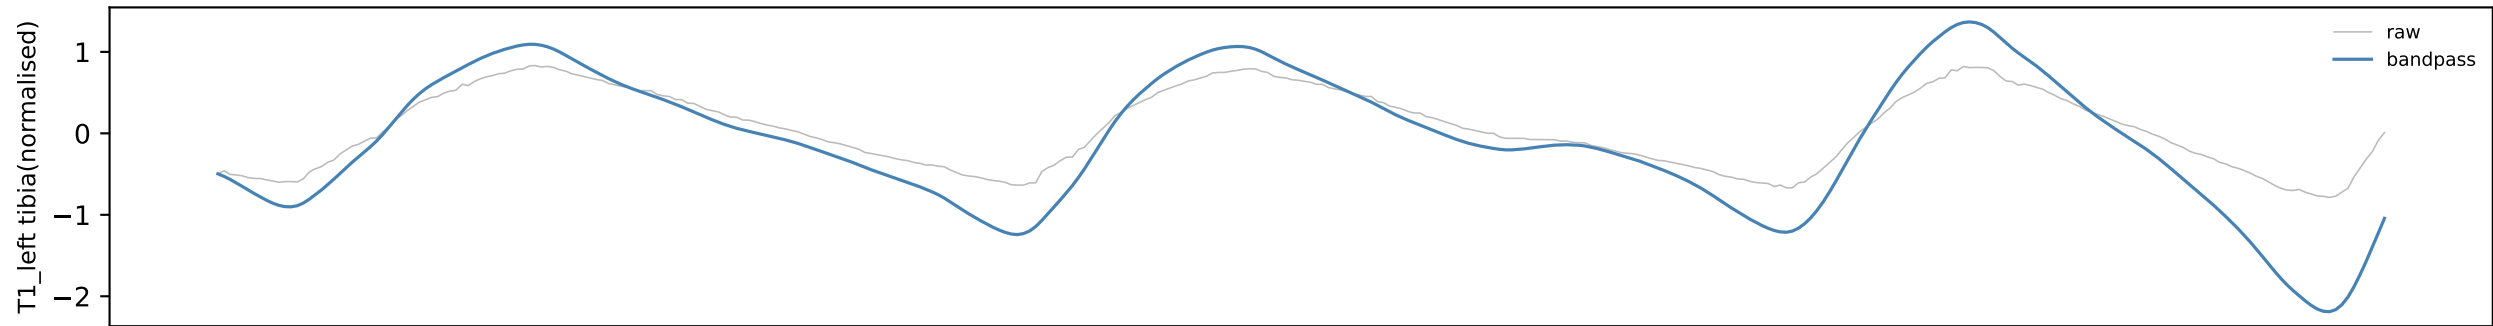

Convention diagnostic | bout_140 (356 frames, 0.45 s)

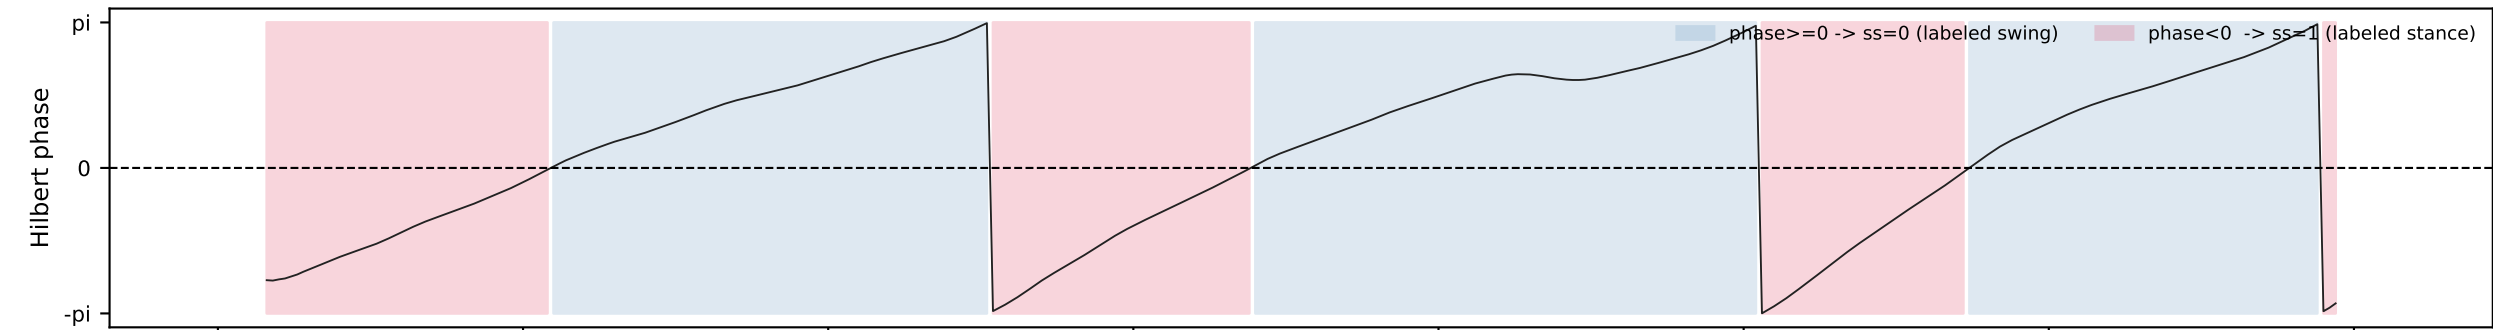

World-frame tip Z (HIGH = leg in air = SWING)

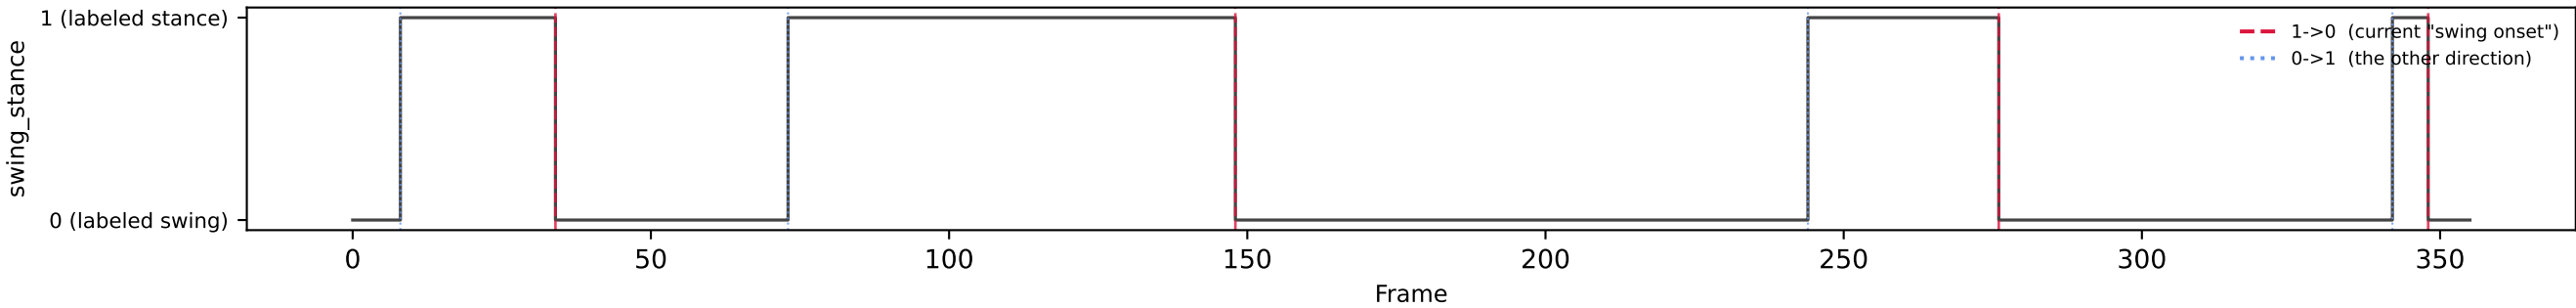

Tibia angle input to Hilbert transform

Hilbert phase (blue bg = phase ≥ 0 = ss=0; red bg = phase < 0 = ss=1)

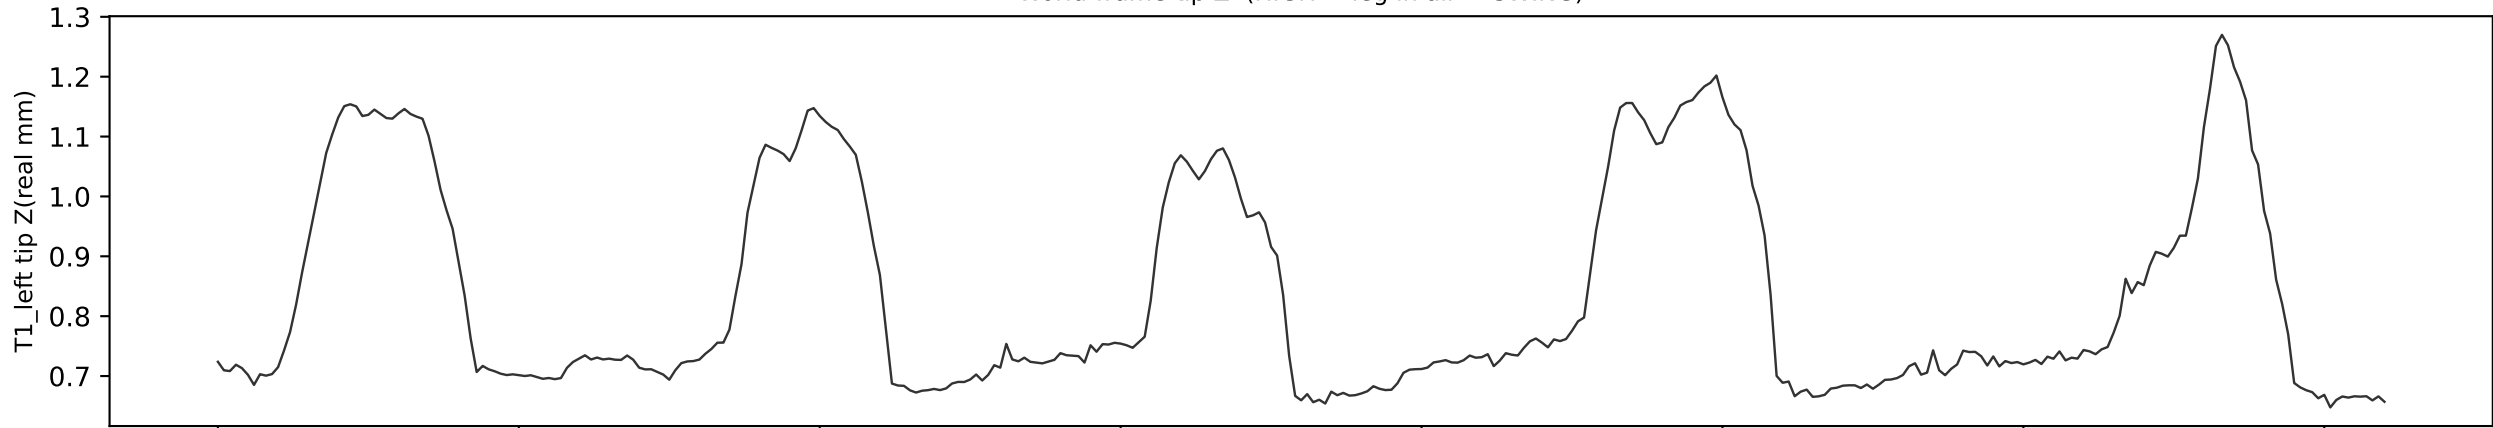

Check: which transition type aligns with RISING tip Z (leg liftoff)?

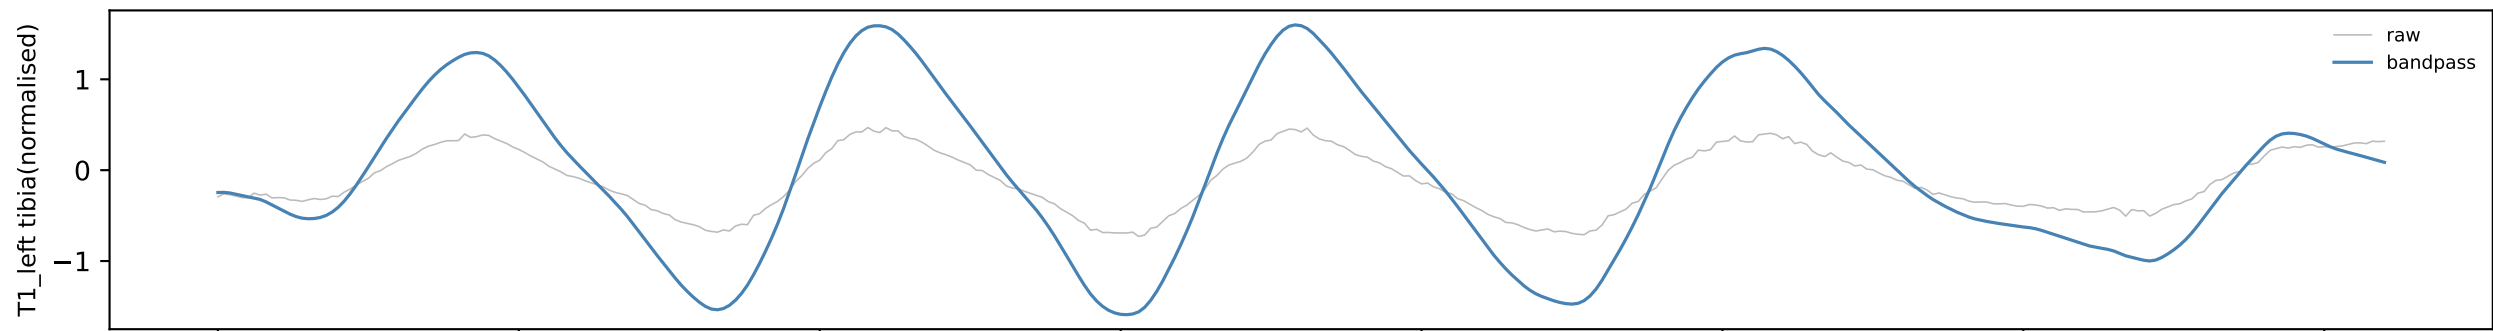

Convention diagnostic | bout_062 (361 frames, 0.45 s)

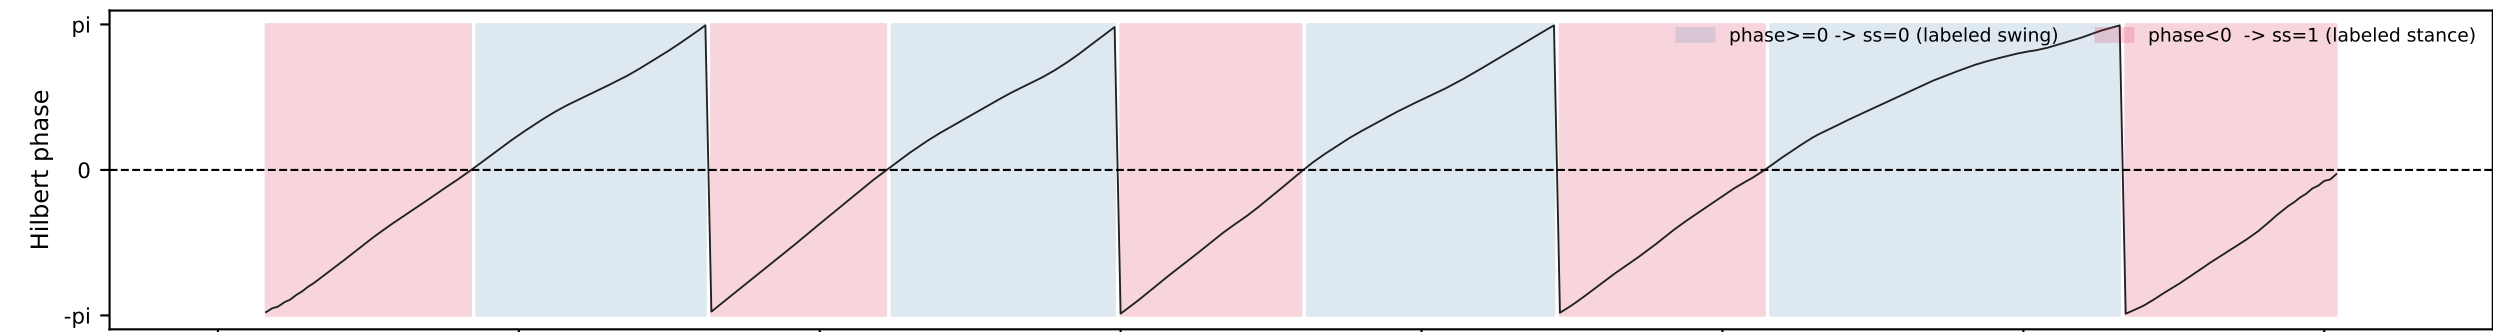

World-frame tip Z (HIGH = leg in air = SWING)

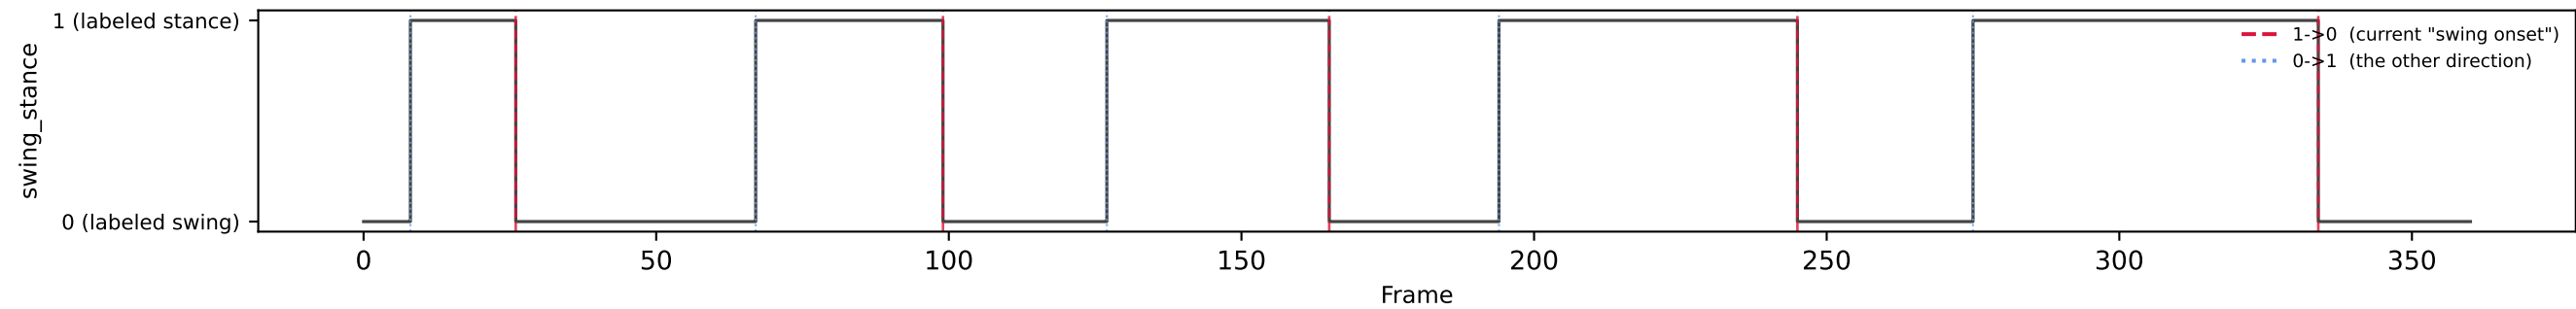

Tibia angle input to Hilbert transform

Hilbert phase (blue bg = phase ≥ 0 = ss=0; red bg = phase < 0 = ss=1)

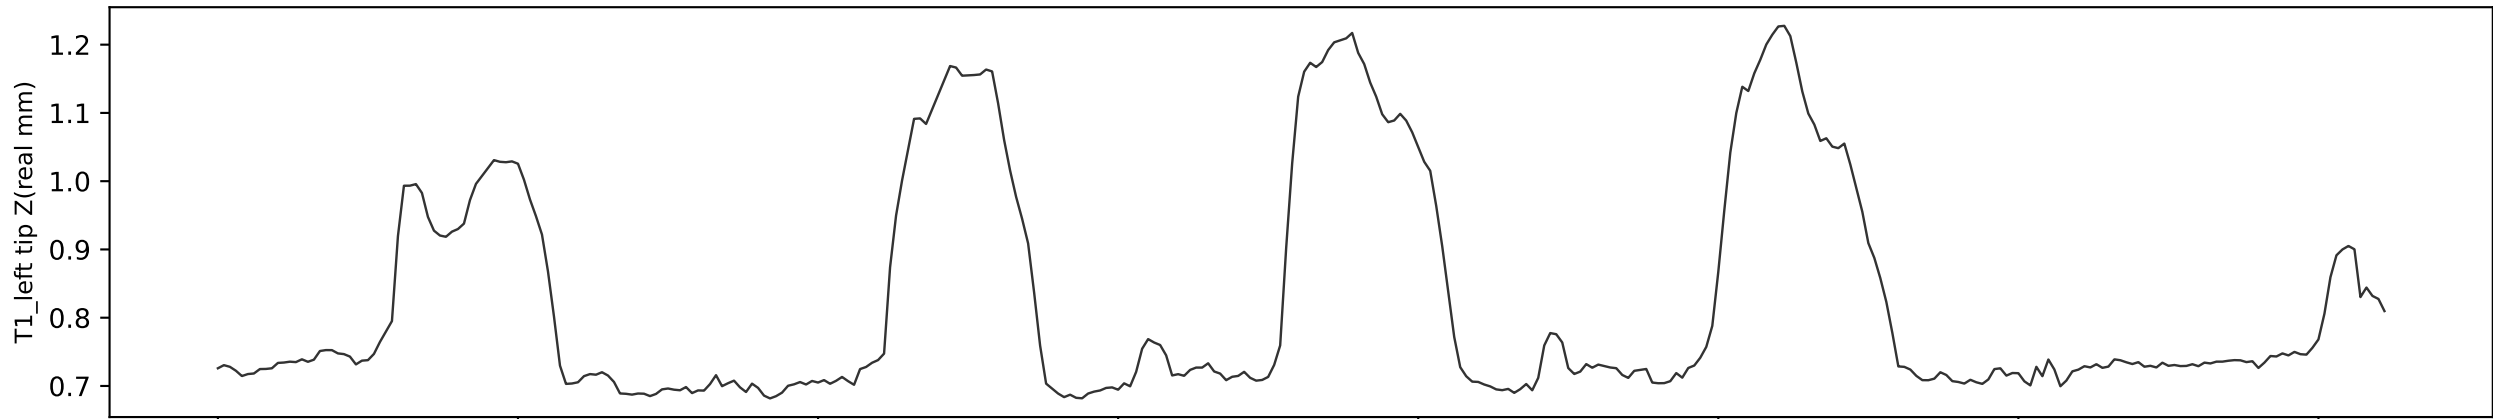

Check: which transition type aligns with RISING tip Z (leg liftoff)?

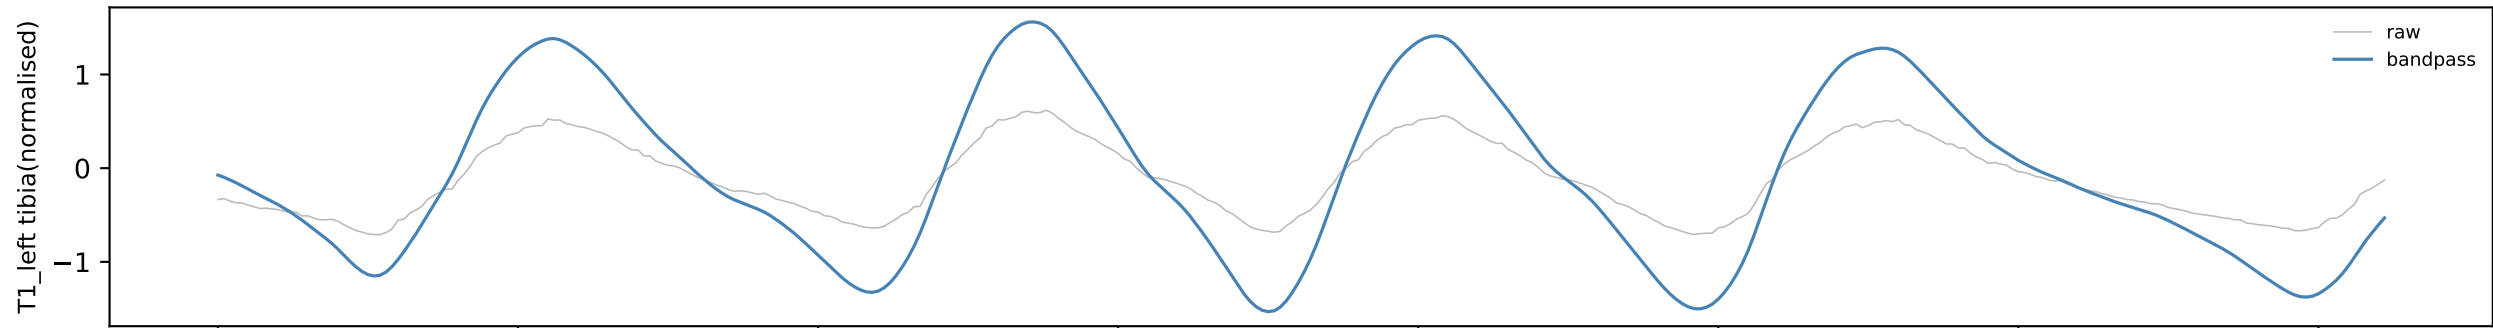

Convention diagnostic | bout_090 (362 frames, 0.45 s)

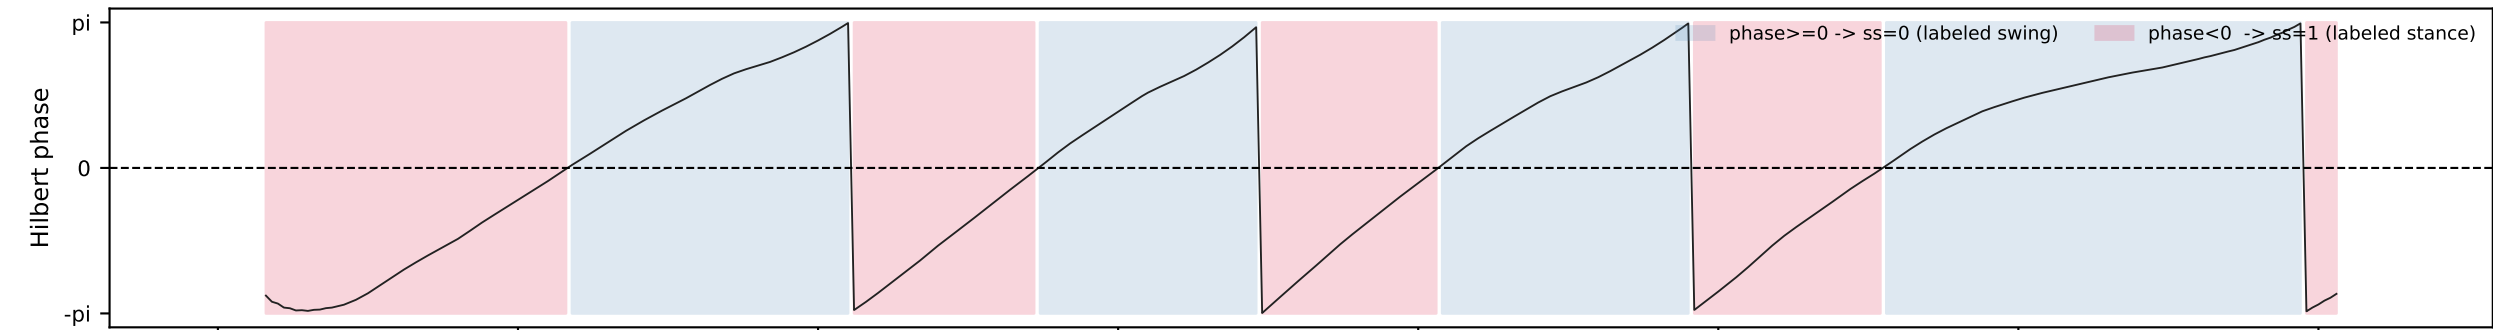

World-frame tip Z (HIGH = leg in air = SWING)

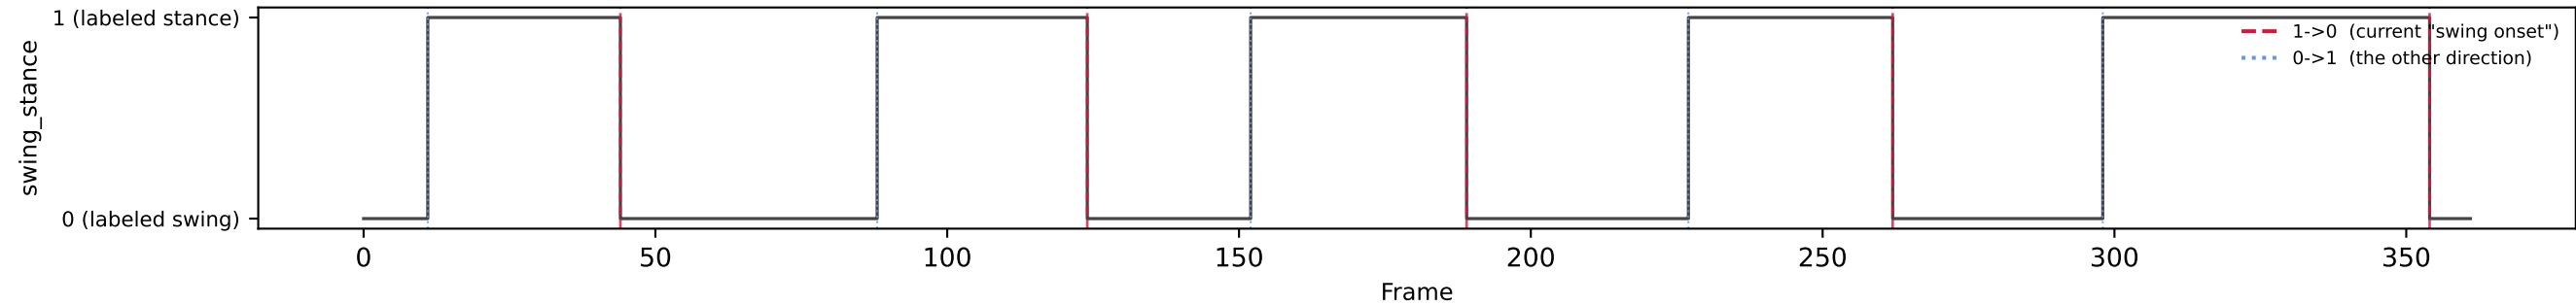

Tibia angle input to Hilbert transform

Hilbert phase (blue bg = phase ≥ 0 = ss=0; red bg = phase < 0 = ss=1)

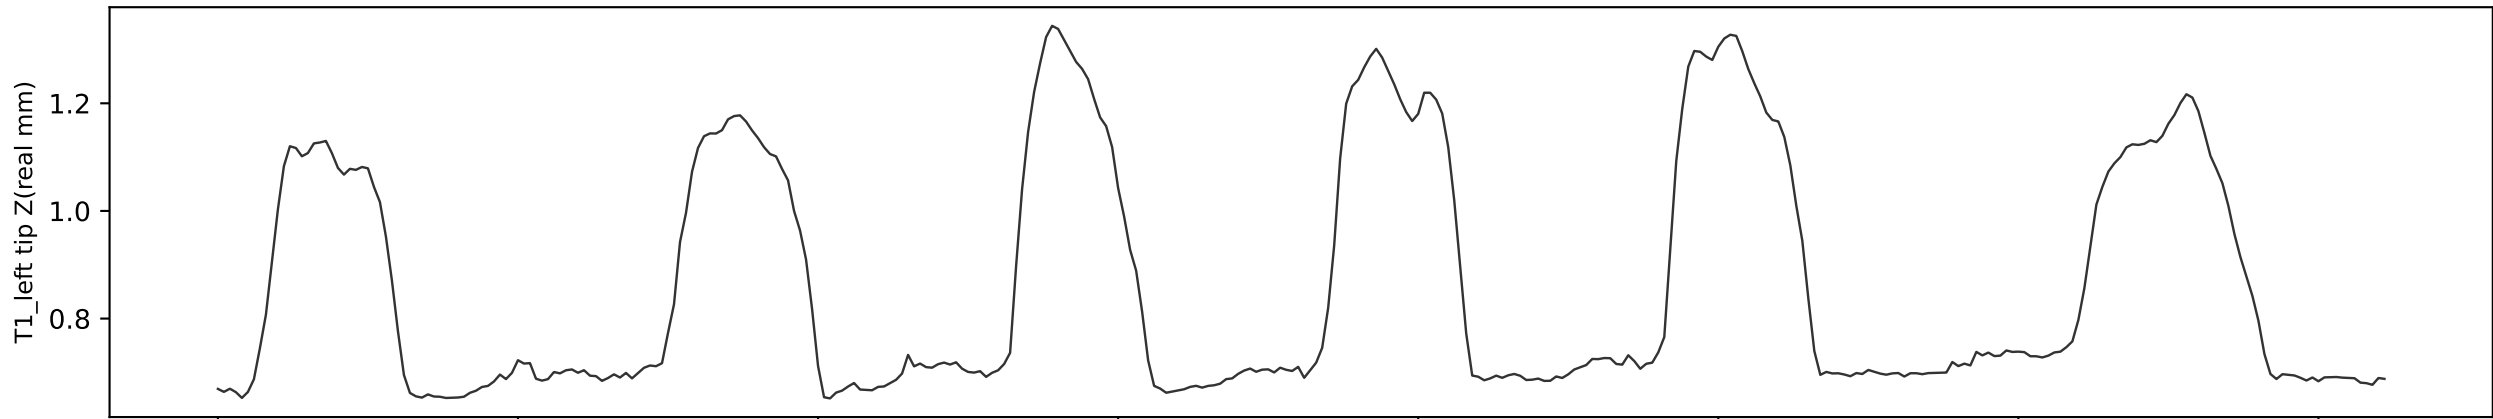

Check: which transition type aligns with RISING tip Z (leg liftoff)?

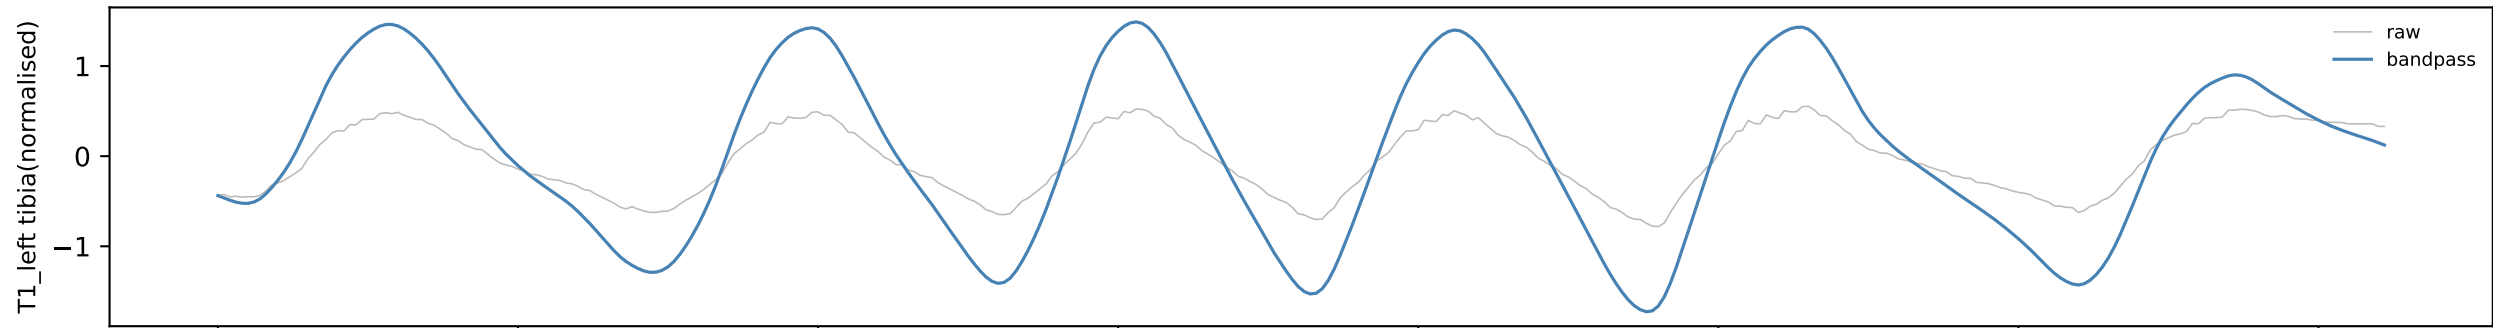

Convention diagnostic | bout_128 (362 frames, 0.45 s)

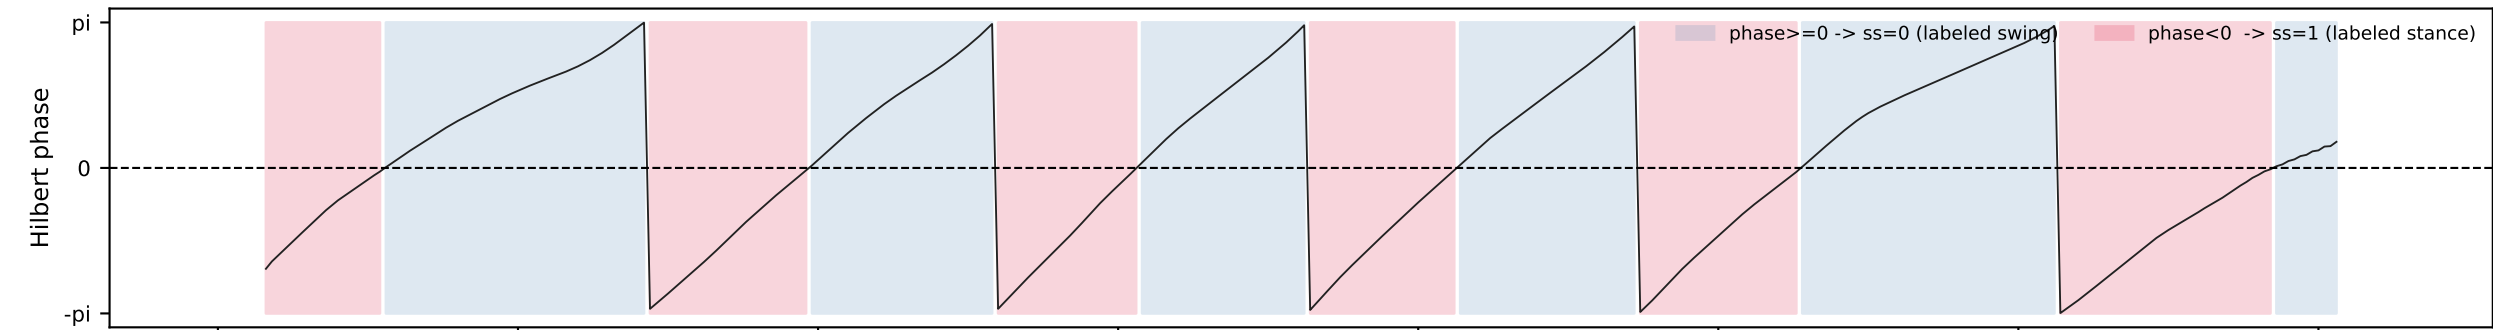

World-frame tip Z (HIGH = leg in air = SWING)

Tibia angle input to Hilbert transform

Hilbert phase (blue bg = phase ≥ 0 = ss=0; red bg = phase < 0 = ss=1)

Check: which transition type aligns with RISING tip Z (leg liftoff)?
